

MOL GAS

Alexandros Lagakos – MD, Eastern Europe
alexandros.Lagakos@molgasenergy.com

Power & Gas Forum / Athens, 6th – 7th April 2026

Our mission

We are a **clean fuels supplier**, focusing on the **delivery of methane and renewable methane** to land-based and marine customers.

We supply clean burning fuels to a wide range of energy-users in the onshore **industrial and mobility sectors**, as well as **coastal and ocean** going ships increasingly switching to **cleaner forms of energy**.

Our objective is to enable more and more customers to transit from heavier, more polluting fuels, to low-emission fuels, **reducing carbon emissions and local pollution**.

Focusing on **safety, reliability, and cost competitiveness**, we handle every aspect of the supply chain necessary for delivering cleaner energy to the point of consumption.

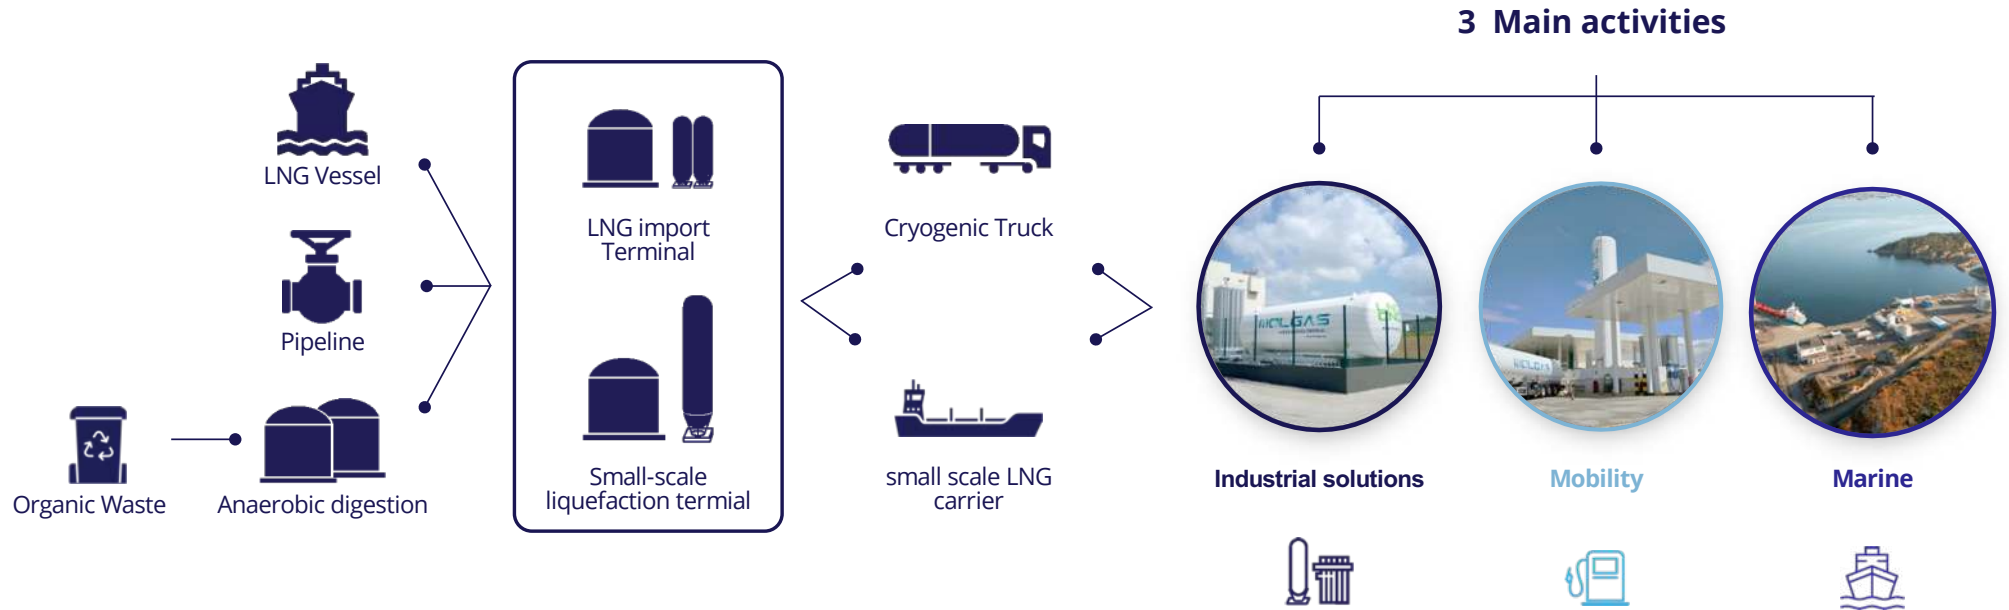

Cleaner fuels, better world

Value chain

End to end supplier of LNG and bioLNG

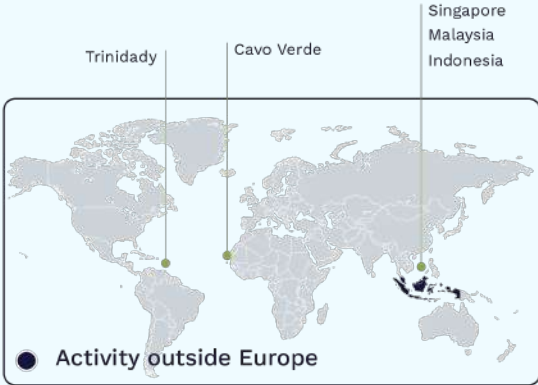

Our presence

Leading independent downstream energy platform

- Nordics
- Central Western Europe
- Eastern Europe

Sourcing LNG from all major European Terminals

European presence of our 3 main activities

>350
Industrial
customers

>220
Mobility
fuelling stations

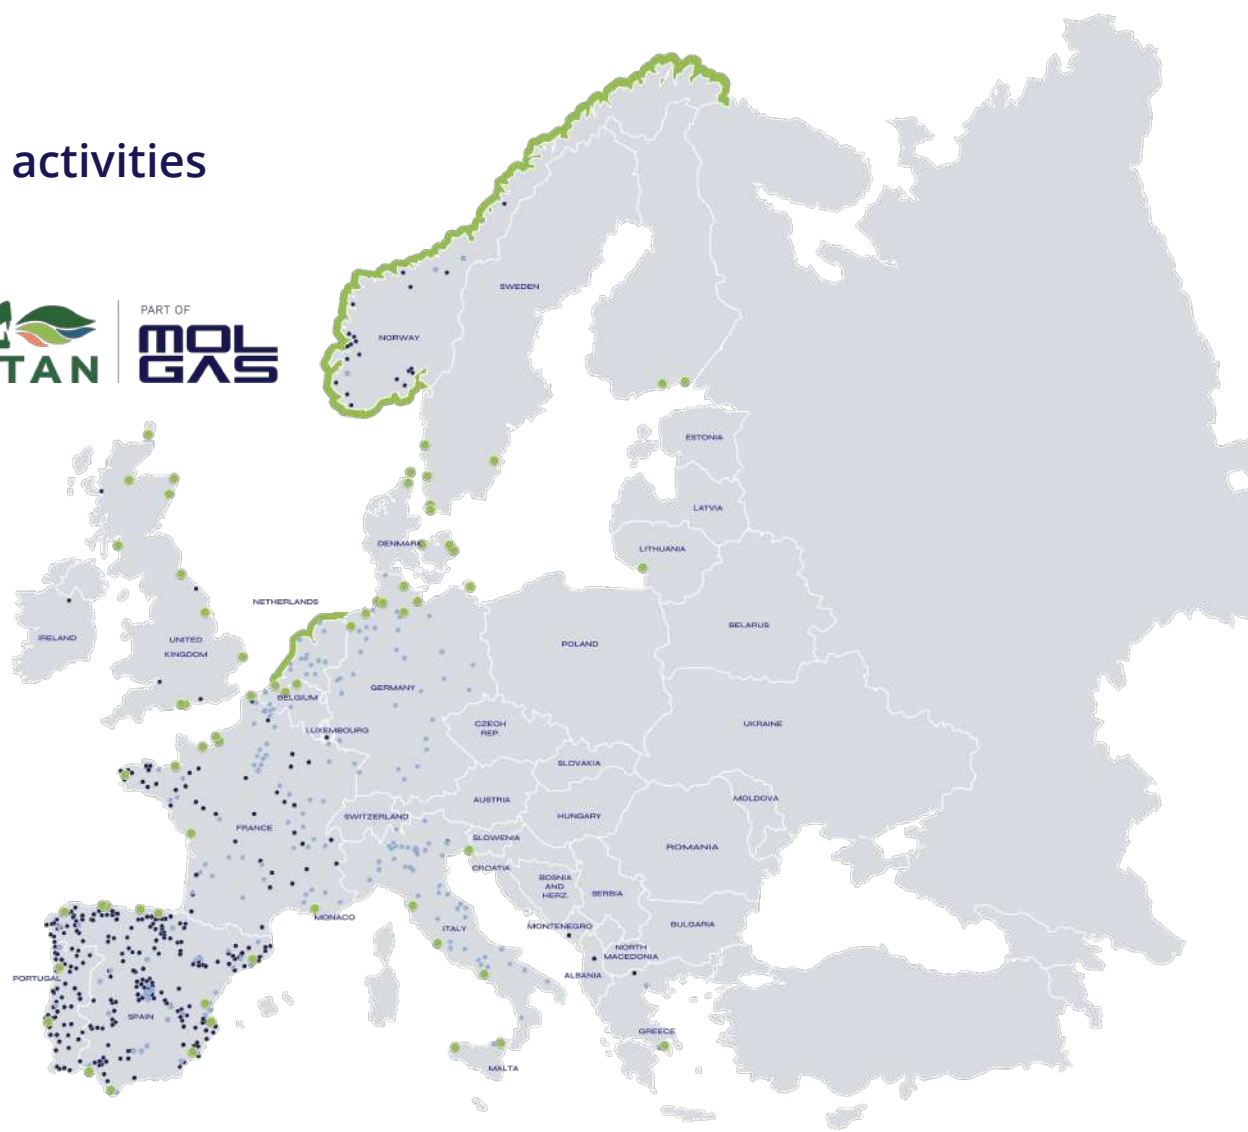

>40
Marine
ports*

Driving efficiency and sustainability

*Ports we operate in + ports we are working on to operate

Molgas in Numbers

Cleaner fuels, better world

PAN-EUROPEAN COVERAGE

>16

countries of operations in Europe

29

Sourcing positions in European LNG terminals across UK, BE, NL, FR, ES, PT, GR

MARKET LEADING PRESENCE

N°1

Independent LNG small-scale player in Europe

Leadership

in 3 segments: Industrial solutions, Marine, Mobility

>500

Highly trained and specialized employees

LARGE AND MODERN ASSET BASE

>145

Trailers and iso-containers (largest fleet in Europe)

140

Satellite terminals owned and operated (largest network in Europe)

8

Bunkering vessels (o/w 6 through Titan, owned or chartered)

PRESENCE ACROSS VALUE CHAIN

12.0 TWh

of LNG distributed annually to our customers

140 kTpa

of liquefaction capacity

200 km

owned pipeline network

>22,000

truck loadings performed annually, driving 8 million kilometers per year

>70

owned fueling stations

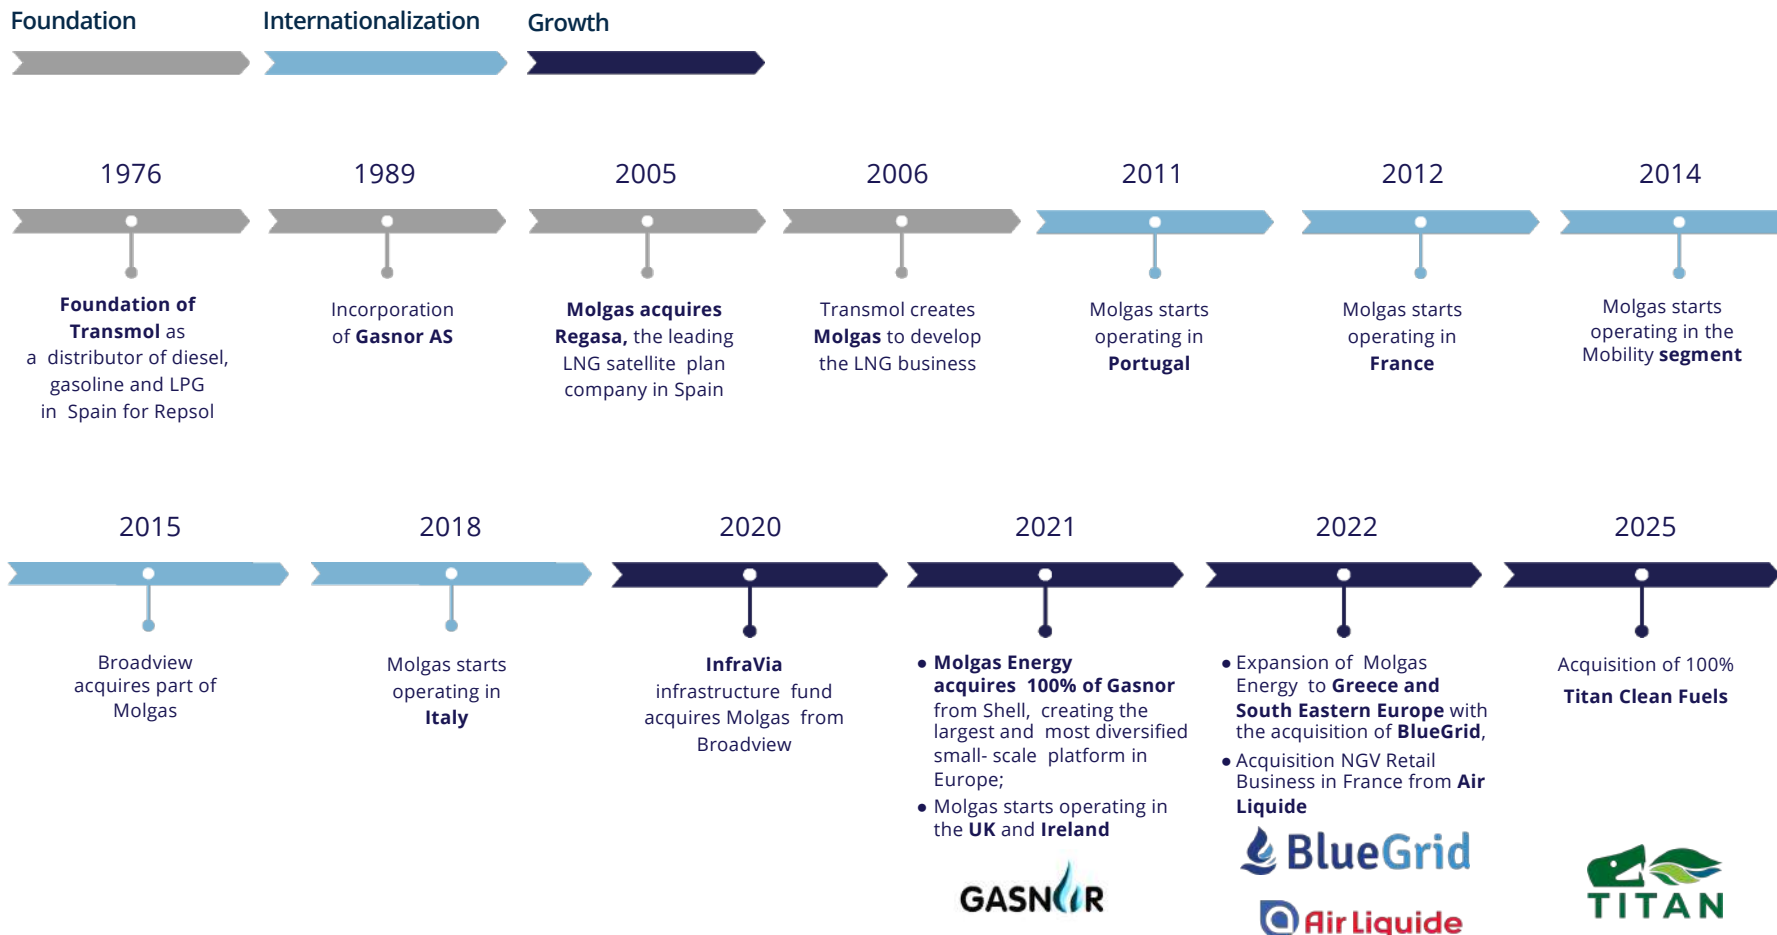

>140

associated stations

providing BIO (LNG, CNG) to heavy duty trucks

> 30 years of experience in LNG; a long history of safety, innovation and growth

A Wide Band of Applications

 **Process Heat**

 **CHP**

 **Data Centers**

 **Cities**

 **Road Transport**

 **Shipping**

 **Biomethane**

...and a lot of national "firsts"

1st Industry switching to LNG

1st LNG delivery to Balkans by a Greek company

1st LCNG Filling station

1st Truck Loading in Revithoussa

Cleaner fuels, better world
